

**Availability of Test Points for Pressure Measurement in Nagar Nigam (NNF),
Firozabad**

The Audit team visited each pumping station and identified pressure measurement provision at pump discharge as given in below table. Out of 185 clean water Pumping Stations 69 Pumping Stations have pressure measurement test points where as 116 Pumping Station do not have any provision for pressure measurement. NNF is requested to install Pressure Measurement test points in these 116 Nos. pumping stations as identified in below table. As all the pumping stations are very old the existing available pressure measurement points need to be checked thoroughly so that at the time of installation these should not break or get damaged. In that case NNF is requested to keep stand by to make alternate provision for the pressure measurement. Apart from that all the sewage treatment plants do not have any pressure measurement test pockets which also need to be installed.

Table of Status of Pressure Measurement Test Points:

Sr. No.	Name of Pumping Station	Test Pockets for Pressure Measurement (Yes/No)
1	Labour Colony Dindayal Park	Yes
2	Labour Colony Siv Mandir	No
3	Labour Colony Best Glass	Yes
4	Labour Colony Thane ke Pass (GAIL India)	No
